SPECIAL DRAWING TRENDS

The interest in the special drawings is at an all time high. Each year we have a substantial increase in the number of applicants. The quota of licenses for some species has also increased dramatically so the chances of being selected in the drawings generally have not been reduced. The following charts give some indication of the trends:

DRAWING APPLICATIONS

In applying for the drawings, a hunter has two factors to take into consideration. He can apply in an area where the chances of being drawn are better but his chances of actually harvesting an animal may be less. The reverse may also be true in that the chances of being drawn in a particular district may be small but the opportunity of harvesting an animal may be almost 100%. These two factors along with land access and the difficulty of the hunt make the selection of a district a very important decision. It is our intention that making the information in this pamphlet available will permit the hunter to make a decision based on facts.

A common comment from the applicants for the special drawings is that they have applied for years in a district and been unsuccessful. Some districts can be very difficult to draw a license. This can be calculated by adding the first choices for both resident and nonresidents and divide this total by the total quota. The resulting number is the number of years of applying that an applicant with average luck would require to be successful.

We hope that this information will be of use to you and we wish you good luck.

1983 HUNTING SUCCESS BY HUNTING DISTRICT

Each year after the close of the general hunting season in Montana the MDFWP surveys resident and nonresident license buyers to obtain hunting and harvest information for management purposes. Estimates are made for each species relating to numbers of animals killed, age and sex of harvest, days afield and hunting success. This information is used not only to evaluate the past management programs but also serves as a basis to formulate new ones. The information can also be useful to sportsmen in planning their hunting activities. Probably the most useful information is hunting success. This information is summarized and presented in the tables on the following pages. In using this information in conjunction with the drawing success information you will notice that generally the areas/license types that have the higher hunting success also have a lower chance of drawing a permit.

** Hunter success can exceed 100 percent in these hunting districts because a hunter can kill one (1) antelope on the first tag and another antelope on the second tag or a possibility of two (2) antelope per hunter.
